Base Frames

All types of base frames can be connected and combined with each other. They form the basic framework for bars, back buffets, trolleys, training modules and buffet sections.

G-Flexx

Foldable base frame made of powder coated aluminum tubes (30/30/2 mm) with milling grooves to accommodate equipment and accessories. Base Plates in frame color, pre-assembled. The G-Flexx base frame forms the basis for accommodating Bar Tops, Work Tops, Front and Side Panels.

W x D x H = 1.200 x 630 x 1100 mm.

W x D x H = 140 x 640 x 1100 mm (folded).

Color: White, RAL 9016

Color: Black, RAL 9005

G-Raxx Frame Adapter

Frame made of powder coated aluminum tubes (30/30/2 mm) with milling grooves. In a combination of G-Raxx basic elements set up with 600 mm distance to each other, two Frame Adapters are needed to reduce the distance between the racks to 540 mm. This allows the use of Drawers and Shelves, as well as a support for 600 mm Work Tops. Without these Frame Adapters, two Work Top Adapters (item. no. xx-tc) are required to support a 600 mm Work Top. The Frame Adapter is mounted to the G-Raxx frames without tools using integrated screws.

Color: White, RAL 9016

Item no. xx-as-wh

EUR/unit

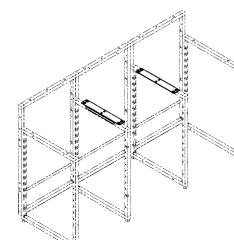

130,-

Color: Black, RAL 9005

Item no. xx-as-bk

EUR/unit

130,-

Work Top Adapter

The stainless-steel plate is required in a combination of several base frames, which are set up with 600 mm from each other. The plate provides a support for the Work Tops projecting over the 600 mm spacing. The plate is not needed if no Work Top is to be used over the 600 mm distance or if the Frame Adapters (item no. xx-as-...) are used on the base frames. The plates can be used on both sides.

Item no. xx-tc

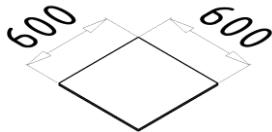

EUR/unit

55,-

Work Tops

For flexible use on all G-Rack base frames. 10 mm HPL solid core panel with inserted stainless-steel nuts on the bottom side to accommodate the wing screws integrated in the base frames.

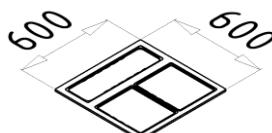

Special cut-outs according to customer specifications can be implemented quickly (prices on request).

Work Top 2-1

Corner Parts

Impressive layouts in L-shape, U-shape or as a 360° bar can be created using Corner Parts.

Corner Set

For each right angle, a Corner Set is required that can be used for all assembly combinations. Configurations can be created from any base frame or with G-Raxx Front Frames. Further information in the download area under: „*Corner Installations*“.

Set consisting of:

- **1x Vertical Corner Rail**

Vertical cover profile made of powder coated aluminum, for connecting base frames and Front Frames (depending on the base frame combination).
Serves as a support for the Corner Work Top.
W x D x H = 85 x 85 x 1070 mm

- **1x Corner Cap**

Corner connection of two Bar Tops in a corner set-up, with integrated wing screws.
W x D x H = 253 x 253 x 92 mm

- **1x Corner Work Top**

Work Top made of 10 mm HPL with inserted stainless-steel nuts on the bottom side to accomodate the wing screws integrated in the base frames.
W x D x H = 650 x 650 x 10 mm

- **Adapter Tubes for Corner Work Top**

Serves as additional support for the Corner Work Top in a corner set-up.
